Description of the Project

StoRIES focuses on providing Users a world-class RI network to foster innovation for the development of new materials for devices and hybrid energy storage applications. The consortium includes 17 partners and 30 beneficiaries from 17 countries all having a vast background in all the energy storage technologies (electrochemical, chemical, thermal, mechanical, and superconducting magnetic storages) from industry, academia and research organisations. The StoRIES project is structured in 7 Work Packages (WPs) including 4 technical WPs (WP1: Energy Storage Eco-System, WP2: Infrastructure, WP3: Services, WP4: Sustainability) and 3 specific WPs dedicated to Dissemination and Exploitation (WP5), Management and Coordination (WP6) and Ethics Requirements (WP7).

The main objectives of the project are:

- **MO1:** Foster a European ecosystem of industry and research organisations on hybrid energy storage technologies
- **MO2:** Provide European industrial and academic researchers access to world-class materials and energy storage related RIs
- **MO3:** Enlarge and advance the integration of the European ES community through new cross-border and interdisciplinary services
- **MO4:** Enhance innovation by involving industry experts in the setting up and implementing of a pro-active innovation support scheme
- **MO5:** Ensure the long-term sustainability of ES research:
 - **SO5a:** by defining scenarios and strategic roadmaps
 - **SO5b:** by setting up a framework for the scientific and technical training of young researchers
- **MO6:** Establish a European reference organisation to promote and coordinate the international cooperation in ES research from and to Europe.

This application form has the following subject:

Application as StoRIES working group expert.

It contributes to the activities in WP1 to achieve MO1.
